

CERAMIC CHUCKS

Rigid and Lightweight

CC-300 & CC-450

FEATURES

- Light Weight
- Rigid Structure
- Stable Performance
- Easy to install
- Structural Ceramic Design
- Customizable

The CC series of standard chucks provides performance and low cost in a single light-weight package. Rapid travel and accurate positioning can be achieved when the mass of the chuck is reduced and rigidity is maintained. Volume production requires fast operation with accuracy and our structural ceramic chucks deliver. If our standard parts cannot be utilized we can provide custom designs for any application.
